## Promotional Displays

3x3 Pop Up Display

### The 3x3 Pop Up Display

The lightweight aluminium frame and ready to use graphics allows this display stand to be erected in minutes.

These 2.3m high stands have 3 front and 2 side graphic panels with a total width of 2.5m. The graphics are digitally printed onto a flexible PVC material which is laminated to provide durability and light abrasion protection. The graphics are then fitted with header bars to hang them from the top of the frame and magnetic strips are fitted to the sides to hold them securely to the front of the frame.

The set comprises of the aluminium frame, full colour graphics, frame struts fitted with magnetic tape, two halogen lights which attach to the top of the frame and are supplied with 3amp plugs and a wheeled storage and transportation case.

Ideal for exhibitions, receptions, showrooms and temporary sales sites, the display can be simply erected and dismantled by a single person, in around 10 minutes. The display and case weighs 24kg and can fit into the back of a medium sized car.

The stand is also available in a larger size. The 4x3 has four front panels and a total width of 3.05m. New or replacement graphics can also be purchased, without the need to invest in a new display stand.

Benefits

- Effective** Over 5 sqm of high impact display
- Convenient** Simple to erect and dismantle
- Cost Effective** Reusable system, change graphics as required
- Practical** Sturdy and durable, suitable for a variety of uses
