Flag Poles

Aluminium Poles

The range of smart and durable aluminium poles are ideal for Showhome promotion and development sites, providing a cost effective solution

Available in 6 or 8m lengths, a standard, two section white powder coated pole is supplied complete with ground sleeve fixing, white truck head, cleat and halyard.

Additional accessories to the pole include a gold finial, for a more prestigious look or a rotating banner arm. The banner arm is designed for use with a 1m wide portrait style flag, however, arms can be cut to suit your needs.

Wall mounted aluminium poles are also available with straight or 35 degree angled mild steel brackets, in 1.5, 2 and 2.5m lengths. Wall mounted poles are ideal for locations that have limited or no space available for a ground mounted pole.

HoF can offer a full survey, installation and maintenance service for their aluminium poles and are also able to offer a storage and direct delivery call-off facility for companies requiring a fast turnaround to multiple locations.

Practical A range of sizes and mounting options available

Durable Hardwearing powder coated finish

Cost Effective Simply installed and maintained

Practical Competitive pricing with storage and call-off
