ID Deluxe Roll Up with Graphics

ID Standard Roll Up with Graphics

### ID Deluxe and Standard Roll-Up Displays

Lightweight and portable banner display stands, ideal for exhibitions, events, promotions, product launches and presentations.

The Deluxe display casing is manufactured from anodised aluminium, which houses all the components of the display. The banner is fitted to a pre-tensioned cassette and top bar which is supported by a telescopic pole. The pole allows for the banner to be held at differing heights, from 1m to a maximum of 2.3m. The casing has two fold out feet for stability and comes complete with a durable storage and carry case. This sturdy and stylish display is supplied with luxurious satin or soflat pvc banners for a high quality, professional finish. The banners are simple to remove and change, without the need for tools, making the display ideal when using for a range of events.

The Standard display has a compact aluminium casing, incorporating two fold out feet for stability. The pre fitted Soflat PVC with stoplight backing banners extend and are supported by a fixed 2m high pole. The display is supplied with a handy storage and carry case.

Benefits

- Professional** Quality displays for all events
- Practical** Easily assembled, dismantled and transported
- Versatile** Choose the display to suit your needs
- Cost Effective** Update and change banners as required
- Compact** All components stored neatly within the casing
