Flags

Powerflags

Guaranteed to make an impact and get you noticed at any event, Powerflags are an eye-catching temporary display.

Available in five sizes, from 1.8m to 5.3m in height, the flags are digitally printed on to a variety of fabrics and can incorporate full colour images or solid colours to suit your requirements.

HoF powerflag poles are made of lightweight aluminium that slots together with an aluminium or carbon fibre rod inserted in the top section, giving the Powerflag its distinctive shape.

Powerflags are suitable for internal or external use and therefore a number of different fixing and base options are available, from a spike for use in soil, sand or snow, internal free standing, parasol, concrete or car base plate styles for use outside or wall mounted brackets. Easy to install, the pole is supplied with a carry bag for ease of storage and transportation.

Ideal for exhibitions, trade shows, retail outlets, sports events, in fact any environment where you want your brand or promotional message to get noticed.

Benefits

- Effective** High impact advertising and branding
- Durable** Robust aluminium poles with a choice of standard or heavy duty
- Cost Effective** Simply order new flags to fit existing poles
- Versatile** Suitable for use in any setting
