

Signage Installation Case Study

**HOUSE
of FLAGS**

Customer: A.S Communications

Products Installed:
1 x Car Park Panel and Post Signs
2 x Building Signs

Number of Installers: 2 People

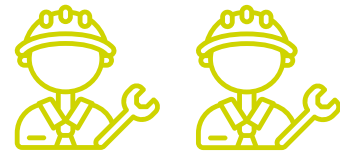

House of Flags installed one car park sign and two building signs for A.S Communications new building.

The installation was completed in one day with two installers as a ladder was needed for installing the two building signs.

The car park sign was installed by digging two holes and filling them with concrete, securing two posts in place which connects to the sign panel.

All of the signage used was made with Dibond which was also supplied by House of Flags.
